About Us

Healing Waters Walk In Tubs is where safety meets luxury. We have combined the essential elements of bath safety with the luxurious natural elements of air and water to provide you with the optimal bathing experience.

Whether you choose one of our walk-in-tubs or a combination tub and shower, your mind will be at ease knowing you have selected a product that was created with you in mind.

Standard Features

Whether you are Aging-in-Place, recovering from an injury or a serious athlete, Healing Waters Walk In Tubs has created a product that will meet your needs. Many of our designs are ADA Compliant with 17" high seats and we contour those seats to provide you with an exceptionally comfortable bathing experience. Low entry risers are incorporated into our designs as well as built-in easy grip grab bars to ensure your safety. Our slip resistant floors are standard in all our bathing units to increase your comfort level as you enter and exit your bath. Both the air and hydrotherapy controls are easy to adjust with only the touch of a button. All of these features are incorporated into our products to give you the perfect combination of both safety and luxury.

Where Safety Meets Luxury:

Air Therapy

Our premium air bath will give you the pleasure of having your body caressed by thousands of warm air bubbles. By infusing the water with heated air, we will provide you with a calming, effervescent bathing experience that will leave your refreshed and relaxed.

Hydrotherapy System

Our premium hydrotherapy bath will deliver a targeted and intense massage using directional and adjustable water jets. This ancient therapeutic process allows for a penetrating deep muscle massage that will leave you feeling rejuvenated and revitalize.

Dual: Hydrotherapy /Air

Our prestigious dual system surrounds your body in the luxury of both the soothing effervescence of the air bath and the penetrating deep muscle massage of the hydrotherapy bath.
